

In this energetic new study, Wendy Mitchinson traces medical perspectives on the treatment of women in Canada in the first half of the twentieth century. It is based on in-depth research in a variety of archival sources, including Canadian medical journals, textbooks used in many of Canada's medical faculties, popular health literature, patient case records, and hospital annual reports, as well as interviews with women who lived during the period. Each chapter examines events throughout a woman's life cycle – puberty, menstruation, sexuality, marriage and motherhood – and the health problems connected to them – infertility, birth control and abortion, gynaecology, cancer, nervous disorders, and menopause. Mitchinson provides a sensitive understanding of the physician/patient relationship, the unease of many doctors about the bodies of their female patients, as well as overriding concerns about the relationship between female and male bodies. Throughout the book, Mitchinson takes care to examine the roles and agency of both patients and practitioners as diverse individuals.

A Voyage Towards The North Pole: Undertaken By His Majesty's Command 1773 By Constantine John Phipps, The Real Dad Rules: The Everyday Steps, Secrets, and Satisfactions of Being a Real Dad, Every Day, The Foreign Policy of John Rawls and Amartya Sen, The Heisman Trophy: The Story of an American Icon and Its Winners, Mercy Without Borders: The Catholic Worker and Immigration, Fives a Crowd (Campbell Family Series),
