Before the invention of the "black box" and the evolution of forensic accident investigation, the causes often remained a mystery. Since the Wright brothers first took flight, aircraft design, pilot training, aircraft maintenance, and air traffic control have all evolved to current standards of safety. Because of lessons learned from tragedies such as what befell the Comets in the 1950s, the Douglas DC-10s in the 1970s, and ill-fated Air India, TWA, and Swissair flights, flight safety continues to improve. In many ways, the history of aviation is the history of air crash investigation.
