

Out of the Scientists Garden is written for anyone who wants to understand food and water a little better - for those growing vegetables in a garden, food in a subsistence plot or crops on vast irrigated plains. It is also for anyone who has never grown anything before but has wondered how we will feed a growing population in a world of shrinking resources. Although a practicing scientist in the field of water and agriculture, the author has written, in story form accessible to a wide audience, about the drama of how the world feeds itself. The book starts in his own fruit and vegetable garden, exploring the how and why questions about the way things grow, before moving on to stories about soil, rivers, aquifers and irrigation. The book closes with a brief history of agriculture, how the world feeds itself today and how to think through some of the big conundrums of modern food production.

Conquering Colitis and Crohns: A Conversational and Interactive Guide to Living a Happy Life while Having IBD, Tigers of the World: The Biology, Biopolitics, Management and Conservation of an Endangered Species (Noyes Series in Animal Behavior, Ecology, Conservation, and Management), Chasing Margaret, Motherhood a Partnership with God, Chief Joseph Dam Project Wash., etc.: A Report Concerning Potential Irrigation in the Vicinity of the Chief Joseph Dam Project, etc. (83rd Cong., 2nd Sess., House Document, 374), On Our Way to English: Leveled Reader 6pk Grade 1 Water, Unto the Daughters: The Legacy of an Honor Killing in a Sicilian-American Family, Дѣла (Russian Edition),
